ONLINE BUSINESS NEWS

SEPT / OCT 2010

Australian Bureau of Statistics has released its latest findings. At the end of June 2010, there were 9.6 million active internet subscribers in Australia. The phasing out of dial-up internet connections continued with nearly 92% of internet connections now being non dial-up. Australians also continued to access increasingly faster download speeds, with 71% of access connections offering a download speed of 1.5Mbps or greater. Mobile wireless (excluding mobile handset connections) was the fastest growing technology in internet access, increasing to 3.5 million in June 2010. This represents a 21.7% increase from December 2009.

ABS report released 20/09/2010

Proportion of Subscribers by Connection type(a)

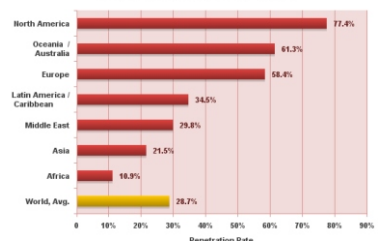

UPGRADE FROM \$99.00
